

## **Family Numeracy Course Feedback**

**We recently offered a family numeracy course, to support parents in developing their own maths skills and develop their understanding of how to help their children. The course was a great success.**

*"It helped me to learn about simple and fun ways to teach mathematical concepts to my son. The handouts given in class were a great benefit."*

*"The course gave me an opportunity to learn diverse methods used for various concepts. It also provided me with a window to interact with other people and benefit from their ideas and experiences."*

*"The course has made me confident that I will be able to help my child with maths and made me realise I would like a wider knowledge of maths for the future. The course has made me look into Maths and English courses so I can better my future."*
