

Outdoor Maths Challenges

for Key Stage 1

Maths activities you can do outside.

1.

Find objects that are different lengths.

Can you lay them in order from shortest to longest?

2.

Go on a shape hunt around your playground.

Look for different shapes and see if you can find any symmetrical shapes.

3.

Use sticks to make some 2D shapes.

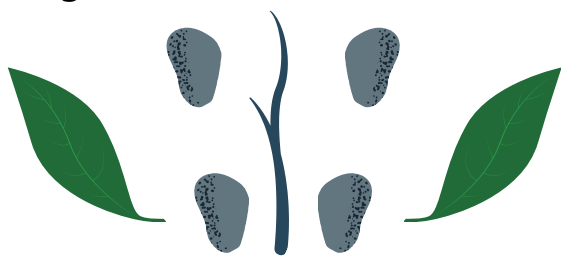

Can you make a square, a triangle and another different shape with more than 5 sides?

4.

Write directions from your classroom to the playground. Use directional words (e.g. turn right), then follow your own instructions when you next go out to play!

5.

Make a symmetrical pattern using sticks, leaves and stones.

6.

How many times can you throw and catch a ball in one minute?

Challenge other people in your house to see if they can beat your score.
